Task 1 Frame corner: From arches to frames

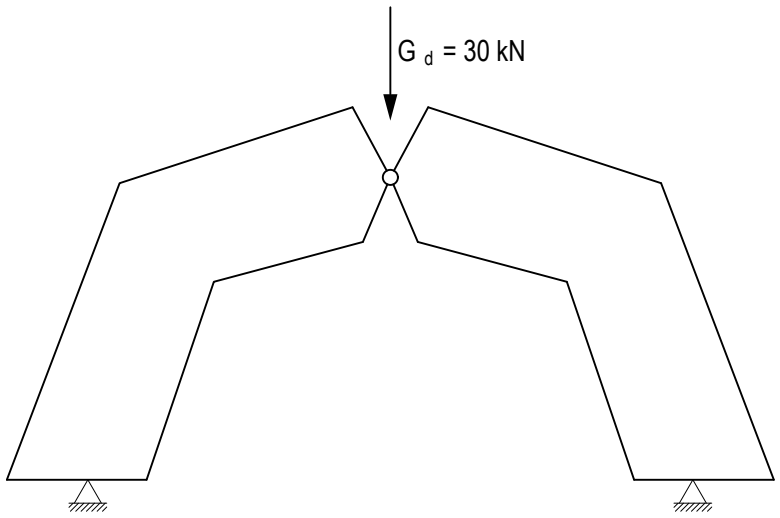

Find the global equilibrium in a) to d) with the help of the thrust line. Then draw a possible force flow and complete the force diagrams. If you add the axis of symmetry in the form as well as in the force diagram, it is sufficient to solve only one side for each situation.

a)

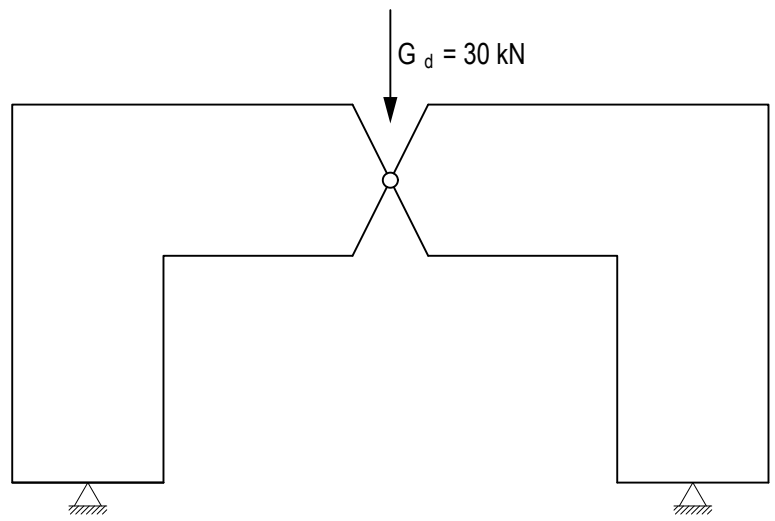

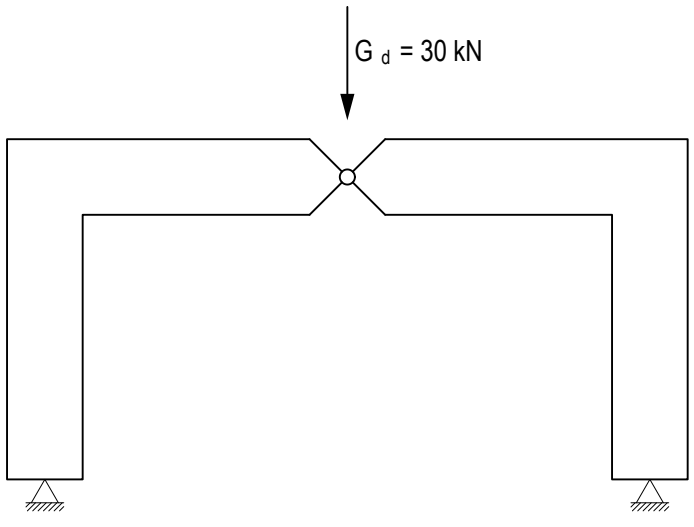

b)

c)

d)

form diagrams 1:100

force diagrams 1cm ≙ 10kN

e) Compare situations a) to d). What do you notice?
